Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 April 2006.

This is the final Office Action for the serial number 10/618,613, DISPLAY APPARATUS, filed on 7/15/03.

Claim Objections

Claims 11-12 are objected to because of the following informalities: Claim 11, 6, "to adjust a height of the bracket" is indefinite because the bracket does not have the ability to move in vertical direction. The adjusting bracket is the only element that moves in vertical direction. It should be changed to ---to adjust a height of the bracket according to the size of the display body--- for clarification.

Appropriate correction is required.

Claim 12 is objected as depending on objected claim 11.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 11 is rejected under 35 U.S.C. 102(e) as being anticipated by International Publication # WO 03/036950 to Min.

Min teaches a display apparatus including a display body having a display part (television, page 3, line 22), comprising a bracket including a supporting bracket (53-54) attached to a wall. The supporting bracket includes an upper opening (57) and an inside of the supporting bracket has a hollow portion. The apparatus includes an adjusting bracket (55 and

Art Unit: 3632

59) having a plurality of screw holes (56). The hollow portion of the supporting bracket at least partially accommodates the adjusting bracket and the display body is a luminescent display.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Min in view of US Patent # 6,923,413 to Dozier.

Min teaches the luminescent display but fails to teach the display is a plasma display. Dozier teaches luminescent display is plasma display (90). It would have been obvious for one of ordinary skill in the art at the time the invention was made to have modified Min's display with plasma as taught by Dozier to improve the picture quality in display.

Allowable Subject Matter

Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art fails to teach a tilting angle adjusting menu is displayed based on the OSD signal according to the input

part, so that the tilting angle of the display body is adjusted according to a selection made based on the tilting angle adjusting menu.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments with respect to claims 11-12 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3632

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
